

Submitting Assignments

How to merge multiple documents into one PDF

- Go to this page: xodo.com.
- Click on "Launch Now."
- Then click on Merge PDFs.
- Under "Open a File," open the files you want to merge by either using the buttons they provide to find the files or by dragging and dropping the files into the box.
- Click "Save" and enter in a file name. Be sure to note where you save that file, so you can find it later.

You may also want to explore SmallPDF.com, which will compress files too large to submit on StudyPlace.
